

Can get POUIDS of a bunch of pros.
Can download their latest 100 games each
Then construct a table looking at
their goal difference at 20 minutes
and the outcome of the match.
Use this to predict their likelihood
of winning the game.

Player	Team	Match No.	GD@20	Match Outcome.

Maybe we look only at T1 and Gen G.
G2 and FNC.

G2 and T1

This is probably the better way to do
it as they are opposite sides of a coin.
G2 is very volatile and T1 is very textbook.

maxcsadvantage
max kill lead
max level lead .

{ first rift herald
first dragon
first tower
first blood .
Total number of kills .
